WELCOME TO THE GLOBAL FAMILY OF VOLVO OWNERS!

Getting to know your new vehicle is an exciting experience. This Quick Guide provides a brief overview of the most common features and functions in your Volvo.

However, for the most up-to-date and detailed descriptions and instructions, as well as important warnings and other information not included in this folder, please refer to your Owner's Manual.

An asterisk (*) indicates optional equipment.

Canada: 1-800-663-8255  www.volvocars.ca
PCC*
1. Green light: vehicle is locked.
2. Yellow light: vehicle is unlocked.
3. Red light: alarm has been triggered.
4. Alternatively flashing red lights: the alarm was triggered less than 5 minutes ago.

- Locks the doors and tailgate and arms the alarm^.
- Unlocks the doors and tailgate, and disarms the alarm^.
- Tailgate: press to unlock the tailgate.
- Approach lighting illuminates lights in door mirrors, cabin, footwells, license plates. Turn signals and parking lights illuminate.
- “Panic” alarm. – Press and hold to sound the alarm. Turn off alarm with unlock button.
- Information about the vehicle can be gathered within a range of 300 ft. (100 m).
  – Press the button and wait for 7 seconds.
  If the vehicle is out of range when the button is pressed, the most recently stored status information will be shown.

^ The accessory inclination and movement alarm sensors can be turned off. See the “Alarm” section of your owner’s manual for information.
^ Automatic relock occurs if no door/tailgate is opened within 2 minutes after unlock.

STARTING THE ENGINE

1. Holding the end of the remote key with the base of the key blade, insert the remote key into the ignition slot and press it in as far as possible.
2. Press the brake pedal.

3. Press the START/STOP ENGINE button briefly to start the engine.

COLDSTART

NOTE
After cold starts, your engine will idle at a higher speed for a short time to bring the engine to normal operating temperature as quickly as possible, enabling the emission control system to function optimally.
KEYLESS DRIVE*

On keyless drive vehicles, it is only necessary to have a remote key in your possession to operate the central locking system and start the engine.

LOCKING AND ARMING THE ALARM
– Press the button on any of the outside door handles. The lock indicator light on the dashboard will start to flash.

UNLOCKING AND DISARMING THE ALARM
– Pull a door handle to unlock and open the door.

STARTING THE ENGINE
– With a remote in the passenger’s compartment, depress the brake pedal.
– Press and release the START/STOP ENGINE button. The autostart function will operate the starter motor until the engine starts.

SWITCHING OFF THE ENGINE
– Press briefly on the START/STOP ENGINE button.

IGNITION MODES

To access ignition modes I or II without starting the engine, **the brake pedal must not be depressed.**

- **0** Vehicle unlocked.
- **I** Remote key fully pressed into the ignition slot: press START/STOP ENGINE briefly.
- **II** Remote key fully pressed into slot: press START/STOP ENGINE for approx. 2 seconds. Mode II should only be used for very short periods to help avoid draining the battery.

See also the table in the section “Ignition modes” in your owner’s manual for information about which components/systems can be used in the various ignition modes.

To return to mode 0 from mode II or I, press START/STOP ENGINE briefly.

SWITCHING OFF THE ENGINE AND REMOVING THE REMOTE KEY

1. Park the vehicle and press the START/STOP ENGINE button to switch off the engine.
2. Pull the remote key out of the ignition slot.

BLIND SPOT INFORMATION SYSTEM (BLIS)*

If the BLIS indicator lights illuminate even when there are no vehicles in the blind area, this may be due to light reflected from a wet road surface, the vehicle’s own shadow against a large, light, smooth surface, or sunlight directly in the camera when the sun is low on the horizon.

If there is a fault with the system, **Blind spot syst. Service required** will be displayed.
1 Turn to adjust volume.
2 Press and hold for ON/OFF. Press briefly to mute/unmute.
3 Press to choose AM, FM1, etc.
4 Press MEDIA to choose Disc, AUX/USB, etc.
5 Press to eject a disc.
6 Turn to select CD tracks from the list.
7 Change CD tracks by pressing the left/right arrow keys briefly. Press and hold for fast forward/back.

**RADIO**

6 Turn to choose a station, press OK to listen. For FM1/FM2, an automatically generated list of the strongest stations is displayed.
7 Search for stations with the left/right arrow keys. Press and hold to find the strongest stations. Press briefly to tune to preset stations. Store up to 10 stations each for FM1/FM2/AM by holding in buttons 0–9 until the stored station is confirmed in the display.

**CD/DVD PLAYER**

5 Press to eject a disc.
6 Turn to select CD tracks from the list.
7 Change CD tracks by pressing the left/right arrow keys briefly. Press and hold for fast forward/back.

**AUX AND USB**

An iPod® or MP3 player can be connected to the infotainment system through the AUX or USB sockets in the center console. An iPod® connected through the USB socket will also be charged.

**HD RADIO**

HD radio reception is subject to coverage limitations. See your Owner’s Manual for details.

---

A cell phone will be disconnected if the infotainment system is switched off.

AUX/USB sockets for e.g., mp3 player. Set the device’s volume to medium for best sound quality; adjust with TUNE (6).

iPod® is a registered trademark of Apple Computer Inc.
AUTOMATIC CONTROL

In **AUTO** mode, ECC controls all functions automatically and makes driving more pleasant with optimal air quality.

1. Turn the control to the desired temperature on the left/right sides of the cabin. The set temperature is shown in the display.
2. Press to automatically control the temperature and other functions.

MANUAL CONTROL

2. Heated driver/front passenger seat*.
3. Max. defroster. Directs maximum air flow to the windshield and front side windows.
4. Blower speed.
5. Air distribution.
6. Heated rear window and door mirrors.
7. Recirculation.
8. Air conditioning Off/On to cool the cabin and defog the windows.

STORAGE SPACES, 12-VOLT SOCKETS & AUX/USB CONNECTOR

The 12-volt sockets in the cabin function in ignition modes I or II.

The 12-volt socket* in the cargo area always functions.

**AUX/USB** can be used to connect e.g., an mp3 player to the vehicle’s infotainment system.

**CAUTION**

Using the optional 12-volt socket in the cargo area with the engine switched off will drain the battery.

LAMINATED PANORAMIC ROOF*

The first press on the control operates the sun shade; the second press operates the laminated panoramic roof. The sun shade must be fully open before the laminated panoramic roof can be opened manually. When the laminated panoramic roof is opened to the tilt (ventilation) position, the sun shade opens/closes automatically.

- **A** – Auto open
- **B** – Manual open
- **C** – Manual close
- **D** – Auto close
- **E** – Open to the tilt position
- **F** – Close from the tilt position
The display shows two separate trip odometers, T1 & T2.

Fuel gauge
The fuel filler door is on the passenger’s side of the car, as indicated by the arrow.

Low fuel level indicator
When the symbol illuminates, refuel as soon as possible.

Trip computer display. Select function with (8).

Clock: Adjust in the MY CAR menu system or with control (6).

Multi-function control
Turn the control clockwise or counterclockwise to set the clock. A short press toggles between T1 & T2. A long press resets the displayed odometer. Setting the clock: turn as far as possible and continue turning until a click is audible.

Press to display or erase a message.
Turn to show trip computer information alternatives.
A short press resets the current function. A long press resets all functions.

NOTE
The display text Miles to empty tank is an approximation, based on recent average fuel consumption.

STEERING WHEEL ADJUSTMENT

1. Release lock
2. Adjust.

WARNING
Never adjust the steering wheel while driving.
CITY SAFETY™ AND COLLISION WARNING WITH FULL AUTO-BRAKE AND PEDESTRIAN DETECTION*
These features help the driver avoid a collision in situations where changes in the traffic ahead combined with driver distraction could result in an accident or other traffic-related incident.

City Safety™ functions at speeds up to 30 mph (50 km/h) and assists the driver by monitoring the vehicle ahead using a laser sensor mounted in the upper section of the windshield.

City Safety™ can help prevent a collision if the difference in speed between your vehicle and the vehicle ahead is less than 9 mph (15 km/h).

If the difference in speed is greater, a collision cannot be avoided but the speed at which the collision occurs can be reduced.

City Safety™ is designed to intervene as late as possible to help avoid unnecessary activation.

OTHER DRIVER SUPPORT SYSTEMS*
The vehicle may be equipped with a number of other optional systems that help the driver e.g., brake in time, keep a safe distance to the vehicle ahead, detect another vehicle moving in the same direction as your vehicle in the side-view mirror’s “blind area” or stay in a traffic lane. These include:

- Adaptive Cruise Control*
- Distance Alert*
- Blind Spot Information System (BLIS)*
- Driver Alert System*
- Lane Departure Warning*

WARNING
The driver is always responsible for operating the vehicle correctly and for keeping a safe distance to the vehicle ahead.

City Safety™ is a supplemental aid to the driver. It can never replace his/her attention to traffic conditions or responsibility for operating the vehicle in a safe manner.

Pedestrian detection does not provide warnings and braking action at speeds above 50 mph (80 km/h). It does not function in darkness and in tunnels and cannot detect pedestrians who are partially hidden, who are less than 32 in. (80 cm) tall or who are wearing clothing that obscures the contours of their bodies.
ADJUSTING THE FRONT SEAT

REMOTE KEY AND THE POWER SEAT
Each of the remote keys can be used by different drivers to store the driver’s seat position. This function has to first be activated in the MY CAR menu system, under Settings -> Car settings -> Car key memory.
Continue as follows:

- Adjust the seat to your preferences.
- Lock the vehicle by pressing the lock button on the remote key that you normally use. This stores the seat’s current position in that remote key’s memory\(^A\).
- Unlock the vehicle (by pressing the unlock button on the same remote key) and open the driver’s door. The driver’s seat will automatically move to the position stored in the remote key (if the seat has been moved since you left it).

\(^{A}\) This setting does not affect the separate power seat memory. Consult your owner’s manual for detailed information.

WIPERS AND RAIN SENSOR*
