Text and symbols on the map

1. The vehicle's current location and a button for viewing the itinerary
2. Map scale
3. List of guidance points in the itinerary
4. Remaining distance to the destination/estimated time of arrival and a button for changing headers
5. Button for listing the itinerary’s Points of Interest (POI) and traffic information
6. Final destination
7. Intermediate destination
8. Guidance point
9. The vehicle (blue triangle) on the planned route
10. Traffic problem and related information
11. Minimize (expanded view) or maximize (full-screen map view)
12. Calculating a new route
13. Repeat the most recent voice guidance
14. Voice guidance On/Off
15. Pause/resume guidance
16. Set a final destination/intermediate destination
17. POI (in this case, a restaurant)
18. Button to reset the map to follow the vehicle (blue triangle)
19. Button for toggling between 2D/3D map views
20. Compass and button for north at the top of the map/current direction at the top of the map
SENSUS NAVIGATION

Sensus Navigation is a satellite-based system providing guidance/directions to a destination and in certain markets, also traffic information. The system includes features that enable you to set itineraries, search for certain types of points of interest (POIs) along your route, store special destinations, obtain traffic information en route, etc.

The system shows the vehicle's exact location and if at any time you should decide to deviate from the route originally set, a new one will automatically be calculated to your destination.

By enabling you to reach your destination quickly and by the most direct route, Sensus Navigation also helps contribute to improving the environment.

To help you fully utilize the features and benefits offered by Sensus Navigation, we suggest that you familiarize yourself with the information provided in this owner's manual.

GETTING STARTED
Getting started with Sensus Navigation
The vehicle’s electrical system (including the navigation system) is activated automatically when the driver’s door is opened.

Navigation On/Off

On
If the navigation system does not show a map on the center display, tap **Navigation** on the upper line on the screen to display a map showing the area around the vehicle and the vehicle’s current location (a blue triangle) on the map.

Off
The navigation system cannot be switched off while the vehicle is unlocked and is instead active in the background.

NOTE
The system can be used even when the engine is not running but will be switched off automatically if the battery charge level is low.

Related information
- Navigation displays and controls (p. 16)
- Quick guidance to a destination (p. 8)

**WARNING**
Observe the following.
- Direct all your attention to the road and make sure that all your concentration is on driving.
- Follow applicable traffic legislation and drive with good judgment.
- Due to weather conditions or time of year affecting the road conditions, some recommendations may be less reliable.

Quick guidance to a destination
The following table provides quick information about setting a destination and starting navigation.

Selecting a destination on the map

<table>

## Step 6

**Center display/menu:**

**Action:**

Guidance will begin. Follow the directions on the instrument panel.
GETTING TO KNOW SENSUS NAVIGATION
GETTING TO KNOW SENSUS NAVIGATION

Common navigation system features
The most common features of the navigation system are described here.
- Where am I?
- Direction at the top of the map/North at the top of the map
- 2D for 3D view
- Zoom
- Scroll
- Find the vehicle symbol on the map
- Change the headers displayed
- Go back to the map view
- "Wrong" language in illustrations

Where am I?
Where is the vehicle's current location?
- Click the vehicle symbol (blue triangle) for information directly on the map.

Direction at the top of the map/North at the top of the map
Tap the compass to change the way in which the vehicle symbol moves on the map
The driver can choose between two views:
- North will always be at the top of the map on the center display and the vehicle symbol will move in the current direction on the map (left is west, right is east, etc.).
- The vehicle symbol will always move towards the top of the center display. The map will rotate under the vehicle symbol according to the direction in which the vehicle turns. The compass symbol indicates north (N) on the map and the vehicle's direction (NE in the illustration).

<table>
<thead>
<tr>
<th>Compass symbols</th>
<th>Direction</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>North</td>
</tr>
<tr>
<td>NE</td>
<td>Northeast</td>
</tr>
<tr>
<td>E</td>
<td>East</td>
</tr>
<tr>
<td>SE</td>
<td>Southeast</td>
</tr>
<tr>
<td>S</td>
<td>South</td>
</tr>
<tr>
<td>SW</td>
<td>Southwest</td>
</tr>
<tr>
<td>W</td>
<td>West</td>
</tr>
<tr>
<td>NW</td>
<td>Northwest</td>
</tr>
</tbody>
</table>

2D or 3D view
Tap 2D/3D to toggle between a 2D/3D map display
In 3D, the vehicle's direction is always upward on the center display. The map will rotate under the
vehicle symbol according to the direction in which the vehicle turns.

The compass symbol indicates north (N) on the map and the vehicle's direction is shown at the center of the compass.

The map scale is not shown in 3D.

2D is described in the previous section "Direction at the top of the map/North at the top of the map."

**Zoom**

**Zoom in**

To make the map larger:

- Tap the center display twice in quick succession with one finger.

  or

- "Stretch" with two fingers on the center display.

**Zoom out**

To make the map smaller:

- Tap the center display once with two fingers.

  or

- "Pinch" with two fingers on the center display.

**Scroll**

Place a finger on the map and swipe in the desired direction. Scrolling is only possible with the map in maximized view.

---

Find the vehicle symbol on the map

Tap the crosshairs

After scrolling/zooming, it may be difficult to find the vehicle's location on the map. To find it:

- Tap the crosshairs: the map will be reset and will follow the vehicle symbol.
Change the headers displayed

The following headers can be displayed on the map:

- Destination, Estimated Time of Arrival (ETA) or Remaining Time to Arrival (RTA)
- Position and the distance to the destination (Dist).

Changing headers is only possible with the map in maximized view.

Returning to the map view

To return to the map view from another part of the system:

1. Press the Home button.
2. If the center display shows its Home view, tap **Navigation** at the top of the screen.

Related information

- Navigation in the instrument panel (p. 44)
- Sensus Navigation settings (p. 44)
CONTROLS
Navigation displays and controls
Volvo Sensus Navigation is presented on the instrument panel and head-up display* and controlled using center display on-screen buttons, the right-side steering wheel keypad and voice commands.

Center display
Searching for and setting destinations and making navigation settings are done on the center display.
If the map is not showing on the center display, tap Navigation at the top of the center display’s Home view.

Instrument panel
During a trip, the driver receives visual guidance on the instrument panel and voice guidance through the infotainment system’s speakers.

Right-side steering wheel keypad and instrument panel
Some of the navigation system's functions, such as Take me home, are controlled from the right-side steering wheel keypad.

Opening/closing the menu
- Press Open/Close (1).

> Menus with alternatives will be opened or closed. The menu will close automatically after a short period or after certain selections have been made.

* Option/accessory, for more information, see Introduction.
Navigating and making selections in a menu
1. Scroll among the alternatives using control (3).
2. Confirm or mark a choice by pressing control (4).
   > The function will be activated and after making certain choices, the menu will close.

Head-up-display (HUD)*

Navigation guidance on the windshield
The driver can also get guidance and information from the navigation system on the lower section of the windshield.

The position of the HUD can be adjusted (see the article "Head-up display").

Voice control
Many settings can be made using voice commands.
Press the voice button on the right-side steering wheel keypad, wait for the tone and then say, e.g., “Drive Home.”

Using voice commands is explained in greater detail in the articles "Navigation system voice control," "Voice control," and "Voice control settings."

Related information
• Setting a destination by entering the text of your choice (p. 27)
• Navigation system voice commands (p. 20)
• Voice control (p. 21)
• Using voice commands (p. 22)
• Voice control settings (p. 23)
VOICE CONTROL
VOICE CONTROL

Navigation system voice commands
Many of the navigation system’s functions can be activated using voice commands.

The procedure for using voice control is described in greater detail in the articles "Voice control," "Using voice control" and "Voice control settings."

Voice commands
The following list contains examples of commands that are unique to navigation system.

To use the voice control system, press the button on the right-side steering wheel keypad and say one of the following commands after the tone:

- "Navigation": Starts a navigation voice command dialog and displays available commands.
- "Take me home": Guidance will be given to the location set as Home. The location for Home is set using the Set home address function in Favorites in the Top view in the center display.
- "Go to [City]": Enter a city as a destination, e.g., "Go to New York."
- "Go to [Address]": Enter an address as a destination, e.g., Go to 125 43 St, New York."
- "Go to [Zip code]": Enter a zip code as a destination, e.g., "Go to 07405."
- "Go to [Name]": Enter a name from a list of contacts e.g., "Go to Robyn Smith."
- "Search [POI]": Search for a POI, which is always sorted according to POIs "around the vehicle." To search along the route, say "Along the route" when the list of results is displayed.
- "Search [POI] in [a city]": Search for a POI in city/location.
- "Search [POI category]": Search for a POI category, which is always sorted "Around the vehicle."

1 You can opt to call the POI or set it as a destination.
• "Search [POI category] in [a city]: Search for a POI\(^1\) category in a city/location.

• "Enter contact: Enter a contact from a list of phone contacts as a destination.

• "Enter POI: Enter a POI as a destination.

• "Change country/Change state: Changes the country/state in which a search is conducted.

• "Enter address: Enter an address as a destination.

• "Enter zip code: Enter a zip code as a destination.

• "Add intersection: Enter an intersection as a destination.

• "Show favorites: Shows a list of Favorites in the center display’s Top view.

• "Clear itinerary: Deletes all intermediate destinations in an itinerary.

• "Repeat voice guidance: Repeats the most recent guidance instruction.

• "Pause guidance: Pauses guidance on the map.

• "Resume guidance: Resumes guidance on the map.

• "Turn off voice guidance: Turns voice navigation guidance off.

• "Turn on voice guidance: Turns voice navigation guidance on.

---

**Related information**

- Navigation displays and controls (p. 16)
- Voice control (p. 21)
- Using voice commands (p. 22)
- Voice control settings (p. 23)

---

**Voice control**

Voice commands make it possible for the driver to voice-control certain functions in the media player, a Bluetooth-connected cell phone, climate system and the Volvo navigation system\(^*\).

Voice control offers convenience and enables the driver to keep his/her hands on the steering wheel and concentrate on driving and the traffic situation around the vehicle.

---

**WARNING**

As the driver, you have full responsibility for operating the vehicle safely and adhering to all applicable traffic regulations.

---

\(^{1}\) You can opt to call the POI or set it as a destination.
Input to the system is in dialog form and comprises commands from the driver and a verbal response from the system.

The voice control system uses the same microphone as the Bluetooth hands-free system and system responses come via the infotainment system’s speakers.

In certain cases, text messages are also provided in the instrument panel.

The functions are controlled using the right-side steering wheel keypad and settings are made from the center console.

**System updates**
The voice control system is being constantly improved and updates should be downloaded for optimal functionality. See the article "System updates" and the Volvo Cars support site support.volvocars.com.

**Related information**
- Using voice commands (p. 22)
- Voice control settings (p. 23)
- Navigation system voice commands (p. 20)

**Using voice commands**
The following is an introduction for using voice commands.

Press the button on the right-side steering wheel keypad to activate the system and initiate a voice command dialog.

Keep the following points in mind when using voice commands:
- When giving a command, speak at your usual speed and in a normal tone of voice after the tone.
- Avoid speaking while the system is responding. Commands cannot be processed during a response.
- Avoid background noises in the cabin when using the system by closing the vehicle’s doors, windows and panoramic roof* when giving voice commands.

Voice command dialogs can be cancelled by:
- Saying "Cancel".
- By pressing and holding the button on the right-side steering wheel keypad.

To speed up a command dialog or to skip system responses, press the button on the right-side steering wheel keypad when the system is responding.

**Voice command examples**
Press , say "Call"-[First-name]"-[Last-name]"-[number category]" to call a contact in your phonebook if the person has more than one phone number listed (i.e., home, mobile, work, etc.).

For example, press , and say "Call"-"Robin"-"Smith"-"mobile".

**Commands/phrases**
The following commands can always be used:
- Repeat: the system will repeat the most recent voice instruction.
- Cancel: cancel the dialog.
- Help: Initiates a help dialog. The system will provide several alternative commands that can be used in a given situation.

The commands for specific situations are described in the respective articles such as "Cell phone commands", etc.

**Numbers**
Numbers can be spoken individually, in groups or the entire phone number can be given at one time.

**Related information**
- Voice control (p. 21)
Voice control settings
There are a number of settings that can be made for the voice control system.

Open the center display's Top view and tap Settings ➔ System ➔ Voice Control and select settings.

- Repeat Mode
- Gender
- Speech Rate

Sound settings
Open Top view and tap Settings ➔ Sound ➔ System Volumes ➔ Voice Control.

Changing languages
The voice control system only understands that languages that can be selected.

Changing the language for this system also affects menus, messages and help texts.

Open Top view and tap Settings ➔ System ➔ Language.

Related information
- Voice control (p. 21)
SETTING A DESTINATION
SETTING A DESTINATION

**Entering a destination**
There are several different ways of choosing a destination.

A destination can be chosen by:
- Clicking on the map
- Entering free text or coordinates
- Selecting a recently set destination
- Selecting a position marked as a favorite from the library
- Selecting a saved destination from the library
- Selecting a point of interest (POI)
- Entering an Address: e.g., State/city/street/intersection/house number

Select one of the alternatives and follow the instructions given.

**Destinations and intermediate destinations (waypoints)**
The first location selected will be the itinerary's final destination.

Any other locations will be the itinerary's intermediate destinations (waypoints).

An itinerary and its destinations can be edited at any time, see also the section "Editing an itinerary" in the article "Itinerary and alternate routes."

**Related information**
- Viewing the itinerary and alternate routes (p. 36)
- Setting a destination by tapping the map (p. 26)
- Setting a destination by entering the text of your choice (p. 27)
- Setting a destination using Recent/Favorites/Library (p. 29)
- Using a point of interest (POI) as a destination (p. 31)
- Setting a destination by entering an address (p. 32)

**Setting a destination by tapping the map**
Tapping a point on the map is one way to set a destination.

To do so:
1. Scroll to the desired point on the map.
2. Press the point until an icon is created there and a menu is displayed.
3. Select Go here to start guidance to that point.

**Deleting the icon**
Tap Delete.
Changing the icon's location
Press the icon on the map, drag it to the desired position and release it.

Related information
- Entering a destination (p. 26)

Setting a destination by entering the text of your choice
Entering the text of your choice is one way to set a destination.

Keyboard
The center display's keyboard can be used to enter most characters when searching for a destination.

To display the keyboard:
Tap **Set dest.** in the lower margin. The keyboard opens for entering text.

Keyboard function keys
1. **Filter:** limit/filter the list of possible destinations.
2. Hide the keys to display a longer list of possible destinations. Tap the field for entering text to return to the keyboard.
3. Tap to toggle between upper and lower case characters.
4. Numbers and special characters
5. Space bar
6. Delete characters to the left of the cursor.
7. Tap to display an area where you can "write" text.

For additional information about using the center display's keyboard, see the article "Using the center display keyboard."
SETTING A DESTINATION

**Entering the text of your choice**
Enter text to search for e.g., streets, cities, map coordinates or points of interest (POIs).

1. Enter a word. Possible destinations meeting your search criteria will be listed according to their distance from the vehicle symbol on the map (or from the center of the map if it has been scrolled).
2. Select/mark a selection in the list. Its **Info card**\(^1\) will be displayed.
3. Follow the instructions on the center display and activate guidance to the destination.

**Filter**
Several filters can be used to limit the size of the list.

- **Along route**: Lists only destinations found along the route.
- **Streets**: Lists only streets/roads meeting the search criteria.
- **Only cities**: Lists only cities/towns meeting the search criteria.

### Filter for POIs
A list of available POIs is displayed at the bottom of the screen, under the three filters.

1. POIs filtered from the marked category (2)
2. POI categories (there may also be sub-categories). Only POIs from the marked category will be listed and only the **Along route** filter can be combined with POI.

---

\(^1\) See also the article "Information cards on the map."
Coordinates
A destination can also be set by entering its map coordinates.

- For example, enter: "N 58.1234 E 12.5678" and tap Search/.

Map coordinates can be written in different ways, such as:

- **N 58.1234 E 12.5678** (with spaces)
- **N58.1234 E12.5678** (without spaces)
- **58.1234 N 12.5678 E** (with the points on the compass after the coordinates)
- **58.1234-12.5678** (with a hyphen without the points on the compass)

Both periods [.] and commas [.] can be used.

Related information
- Entering a destination (p. 26)
- Navigation displays and controls (p. 16)
- Information cards on the map (p. 39)

Setting a destination using Recent/Favorites/Library
Selecting from a list is one way of setting a destination.

To display these lists:

1. Tap Set dest. in the lower margin. A keyboard will be displayed with search alternatives in the upper margin.
2. Continue by selecting one of the lists in the upper margin:

- **Recent**
- **Favorites**
- **Library**

After marking an alternative, it will be added as a destination by tapping the Start navigation or Add as waypoint buttons.

Recent
This is a list of all searches that have been made. Scroll through the list and select.
This menu alternative is also available in the instrument panel and can be displayed using the right-side steering wheel keypad (see also the article "Navigation system displays and controls").
This is a list of locations that have been set as favorites from the Library. Scroll through the list and select.

A deleted location in Favorites always remains in the Library but the "star" will not be highlighted. To return it to the list of Favorites, go to the Library and tap the location's star again.

Use Set home address to program a destination that is used often. A destination set as Home will also be available in the instrument panel and can be displayed using the right-side steering wheel keypad (see also the article "Navigation system displays and controls").

Use Edit list to edit destinations in the list.

This is a list of saved destinations and itineraries. The most recently saved one will be at the top of the list. Scroll through the list and select.

Tap the destination's "star" to select/deselect it as a favorite. A selected destination will also be shown under the heading Favorites.

A destination deleted from the Library will also be deleted from Favorites.

The library can be sorted by:
- Added
- Name
- Distance
- Received: this is a filter

With Received, destinations sent to the vehicle using the Send to Car function can be filtered. New, unread destinations have a BLUE marker that disappears when they have been read. See the article "Saving a destination with send-to-car" for additional information.

Use Edit list to edit the respective destinations with respect to Name, Location, Internet address and Phone number (max. 3 phone numbers per destination).

Related information
- Saving a destination with Send to Car (p. 32)
- Navigation displays and controls (p. 16)
- Entering a destination (p. 26)
Using a point of interest (POI) as a destination

Selecting a point of interest (POI) is one way of setting a destination.

1. Tap **Set dest.** in the lower margin. A keyboard will be displayed with search alternatives in the upper margin.

2. Continue by selecting a POI from the upper margin.

Examples of POIs

Many POIs (e.g., restaurants) have sub-categories (e.g., Chinese restaurants).

Proposed POIs are listed according to their distance to the vehicle symbol on the map (if it has been scrolled).

See the article "Map settings" for information about selecting the POIs to be displayed on the map. This will show the selected POIs available in the area. This setting does not affect searches for POIs to be used as destinations (even ones that have not been selected for display can be used as a destination).

Certain POIs will only appear if the map scale is greater than 1 mi. (1 km).

Proposed POIs are listed according to their distance from the vehicle symbol on the map or from the center of the map if it has been scrolled.

**Related information**
- Entering a destination (p. 26)
- Map settings (p. 45)

**NOTE**

- The appearance, number and variations of POIs vary from market to market.
- Some symbols may be added/deleted when the navigation system's software is updated. The POIs available for the current map system can be found in the menu system.

**Filters**

When an itinerary has been activated and a POI category has been selected, a filter will be available to limit the search list to only show POIs along the route. This list can then be sorted by name or distance.

- **Along route:** only shows POIs along the route.

With filters activated, the list can be sorted by Name or Distance.
Setting a destination by entering an address

Entering an address is one way to set a destination.

Tap Set dest. in the lower margin. A keyboard will be displayed with search alternatives in the upper margin.

2. Continue by selecting an Address from the upper margin. Additional search fields will be added.

Select any of the following alternatives and enter text using the center display's keyboard:

- Country/State/Province
- City/Territory/Zip code
- Address
- Number
- Junction

Related information
- Entering a destination (p. 26)

Examples of search fields

The following search alternatives may vary somewhat from market to market. Only those available for your market will be shown in the center display.

Saving a destination with Send to Car

Using the Send to Car feature is one way to save a destination.

Send to Car is a function that makes it possible to add a destination/location to the navigation system from a computer.

Send to Car can also be done from a cell phone using Volvo's Volvo On Call (VOC) service.

VOC can also be used to send a destination from the VOC customer service center to the vehicle.
Enter the vehicle’s VIN number or Volvo ID and select Send.

1. Go to the Internet site here.com: a map service will open.
2. Right-click the desired location.
3. Select Send this location to car.
4. Enter the vehicle’s VIN number or Volvo ID.
5. Select Send: the location will be sent to the vehicle’s library (list of destinations), where it will be indicated by a blue marker.

The driver will then be alerted to this by a symbol that illuminates in the center display indicating that a destination/location has been sent to the vehicle. Tap the symbol and a card will open showing information and possible alternatives.

Please note that the procedure shown here is just an example from one of many map service providers. See the Volvo Cars support site (support.volvocars.com) for more information about the Send to Car function.

**Related information**
- Setting a destination using Recent/Favorites/Library (p. 29)
- Entering a destination (p. 26)
TRAVEL PLAN AND ROUTE
TRAVEL PLAN AND ROUTE

Viewing the itinerary and alternate routes
During guidance, it is possible to view the itinerary or see if alternate routes are available.

Viewing the itinerary
To view/display the itinerary:

Tap Position: or Destination: to display the current itinerary.

Editing an itinerary
An itinerary can be edited:

Select a line in the itinerary and follow the instructions provided

Deleting an itinerary
The entire itinerary or intermediate destinations (waypoints) can be deleted:

1. Tap Position: or Destination: to display the current itinerary.

Select a particular waypoint or Clear itinerary and confirm the choice

Viewing alternate routes
The driver can check for alternate routes at any time while guidance is underway. To do so:
2. Tap **Alternative routes** to view alternate routes (if available) for the remainder of the itinerary.

3. Select one of the following:
   - Fast
   - Eco
   - Scenic

4. Tap the map. The updated itinerary will be shown on the map and guidance will resume.

See also the section "Alternate routes" in the article "Route settings."

**Related information**
- Guidance points in the itinerary (p. 37)
- Choosing a detour (p. 40)
- Viewing the itinerary and alternate routes (p. 36)
- Information cards on the map (p. 39)
- Route settings (p. 47)

**Guidance points in the itinerary**
A list of coming guidance points helps the driver prepare for the next turn, etc. by e.g., getting into the correct traffic lane, etc.

Guidance points in an itinerary
A list of coming guidance points will appear on the map when the itinerary is activated. The list can be expanded by tapping the down-arrow (tap the up-arrow to minimize). The next guidance point is always at the top of the list.

Tapping any of the guidance points in the list will scroll the map to the related position. Subsequently tapping the map’s crosshairs (below the 2D/3D button) will return you to the map guidance view where the map shows the vehicle’s current location.
POIs along the route
A list of points of interest (POIs) along the route can be displayed.

1. Tap Ahead

A list will show the current POI categories e.g., near an exit or service area.
2. Then tap "POI" for information about POIs along the route

1. Select the desired category to open a list, sometimes with sub-categories.
2. Continue to "zoom in" until a particular POI can be selected.
3. Mark a POI in the list. Its information card will be displayed.
4. Select one of the card's alternatives and follow the instructions.

POI suggestions will be listed based on their distance on the map from the vehicle symbol or the center of the map (if it has been scrolled). The POI at the top of the list is closest to the vehicle.

Related information
• Using a point of interest (POI) as a destination (p. 31)

Traffic problems along the route
A list of traffic problems along your route can be displayed.

1. Tap Ahead.

2. Then tap Traffic for information about traffic problems along the route
For information about a specific traffic tie-up:
• Select it in the list to get specific information.
Use the selection Avoid to be rerouted to an alternate route to your destination.

Related information
• Traffic information (p. 42)
• Traffic information settings (p. 49)

Information cards on the map
Each icon on the map for a destination, intermediate destination (waypoint), favorite, POI, traffic problem, etc., has an information card that can be opened by tapping the icon.

Opening an icon's Info card gives the driver up-to-date information about the respective icons.
Information and possible alternatives vary depending on the type of icon.

Example of an information card for a POI
In this example of a highlighted POI, the driver can select e.g.:
• **Start navigation**: save the POI's location as a destination
• **Add as waypoint**: save the POI's location as an intermediate destination

• Save: save the location in the Library. See also the article "Entering a destination using Recent/Favorites/Library."

Related information
• Viewing the itinerary and alternate routes (p. 36)
• Guidance points in the itinerary (p. 37)
• Choosing a detour (p. 40)
• Route settings (p. 47)
• Setting a destination using Recent/Favorites/Library (p. 29)
Choosing a detour
Select Detour to avoid the next section of a route if e.g., a road is closed.

Detours

1. Tap Detour: information about an alternate route will be displayed on the map (the alternate route's distance, estimated travel time, etc.).

   Normally, only short detours are proposed to take you quickly back to your itinerary's original route if possible.

2. To accept the proposal, tap the sign with information about the detour
   To reject the proposal, tap the X button (Cancel). Guidance will continue along the current route.

3. After a proposal has been accepted, guidance will resume, using the detour as the new route.

   As an alternative to Detour, select another route and leave your itinerary's current route. The system will update the route automatically and continue guidance to your destination along the most suitable route.

   See also the article "Viewing the itinerary and alternate routes."

- Information cards on the map (p. 39)
Traffic information

The navigation system constantly receives traffic messages that are broadcast by local radio stations.

See the article "Traffic settings" for the traffic-related settings available to the driver.

Directly on the map

Traffic jams, road construction areas, accidents, etc. are shown on the map in the form of various symbols.

In cases of major traffic disruptions, their extent is shown on the map as RED lines along the side of the road (in e.g., road construction areas). This line will also indicate the direction (there will be lines on both sides of the road if both sides are affected).

- Tap the symbol for additional information about the traffic problem.

If the traffic problem affects your chosen route, you can opt to select **Avoid** to prompt the system to find an alternate route.

- Traffic information settings (p. 49)
- Traffic problems along the route (p. 38)

---

1 Not available in all markets.
Navigation in the instrument panel
An activated route will automatically be displayed in the instrument panel.

Instrument panel (driver display)
The driver can opt to get navigation information in the instrument panel even if no route/itinerary has been set.

Activating/deactivating map display in the instrument panel
Path:
Settings → My Car → Displays → Driver Display Center Area → Driver Display Options

- Mark the alternative Show Map.

Related information
- Sensus Navigation settings (p. 44)
- Navigation displays and controls (p. 16)

Sensus Navigation settings
These settings affect e.g., the way in which routes are selected and how information is displayed.

Navigation can be presented in various ways and the user can set different parameters to personalize the way in which the map is displayed on the screen.

To access the navigation settings:
1. Pull down the center display’s Top view.
2. Select Settings → Navigation → Route.

The following types of settings are available:
- **Map**: settings for the content and appearance of the map
- **Route**: settings for the way in which routes are calculated and displayed
- **Traffic**: settings for traffic information
• **Guidance**: settings for guidance
• **System**: information about map and software updates

**Related information**
• Map settings (p. 45)
• Navigation in the instrument panel (p. 44)
• Route settings (p. 47)
• Traffic information settings (p. 49)
• Guidance settings (p. 50)
• System settings (p. 51)

---

**Map settings**
These settings are used to determine how the map will be displayed on the screen.

![Map settings interface](image)

**Alternatives:**
• Position Format
• Map Design
• POI
• Favorites
• Speed Cameras

---

2 Not available in all markets.
Location format

Select to display the current location by address or by coordinates:
- Address
- Coordinates and altitude

The following illustration shows both alternatives:

Map design

Select map background lighting:
- Day: bright colors
- Night: Dark colors for better night vision
- Automatic: the system will shift between Day and Night based on the ambient light in the passenger compartment.

POI

Select the POIs to be displayed on the maps. Each main category has two alternatives: every POI category will be displayed or...

POI main categories

...open the category by tapping the ">" symbol and selecting the sub-categories to be displayed.
POI sub-categories

- Mark the POI categories to be displayed on the map. Exit the menu by tapping Back or Close.

See also the article "POI as destination."

Favorites

Choose to display Favorites on the map:
- Yes/No

See also the article "Entering a destination using Recent/Favorites/Library."

Speed cameras

Choose to display speed cameras on the map:
- Yes/No

Related information

- Sensus Navigation settings (p. 44)
- Setting a destination using Recent/Favorites/Library (p. 29)
- Using a point of interest (POI) as a destination (p. 31)

Route settings

The following settings determine how a route will be calculated.

Not available in all markets.
SETTINGS

Possible settings:
- Route Learning
- Alternative Routes
- Default Route Type
- Avoid
- Arrival Time Format

Route learning
Allow data to be collected to optimize route calculations:
- Yes/No

Alternative routes

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Eco</td>
<td>18</td>
<td>—</td>
<td>01:46</td>
</tr>
<tr>
<td>Fast</td>
<td>18</td>
<td>—</td>
<td>01:45</td>
</tr>
<tr>
<td>Scenic</td>
<td>—</td>
<td>—</td>
<td>01:50</td>
</tr>
</tbody>
</table>

Show 3 alternative routes before guidance begins:
- Yes/No

Default route type
Select the default type of route to be used:
- Fast
- Eco
- Scenic

This setting can also be changed while driving. See also the article “Itinerary and alternate route.”

Avoid

Mark the types of roads to be automatically avoided when a route is calculated:
- Tunnel
- International Border
- Congestion Charge Zone
- Car train

Arrival time format
Choose among:
- ETA (Estimated Time of Arrival)
- RTA (Remaining Time to Arrival)

3 Not available in all markets.
Traffic information settings

These options determine how traffic information is presented.

Path:

Settings ➔ Navigation ➔ Traffic

( Settings > Navigation > Traffic )

- Traffic Events
- Free Flowing Traffic
- Avoid Traffic Events
- Traffic Provider: %s

Traffic events
Filter the type of traffic information to be displayed on the map and determine how a route is to be calculated. The alternatives are:

- None
- Major
- All

Free flowing traffic
Select if free-flowing traffic is to be displayed on the map (shown as green lines). Select:

- Yes/No

Orange or red lines are set according to the current traffic situation and cannot be avoided.

Avoid traffic events
Select to allow the system to automatically avoid traffic problems along the route. Select:

- Never
- Ask
- Always

When calculating a route, the system will take these settings into account. The driver will have to "confirm" events that occur during a trip.

Traffic provider:
Set the source of traffic information

4 Not available in all markets.
5 Not available in all markets.
## Guidance settings

This section lists guidance settings.

### Voice guidance level
Set the amount of guidance information provided:
- **None**: no automatic guidance but guidance can be requested manually once.
- **Low**: one message per guidance point.
- **Moderate**: up to three messages per guidance point, with limited information.
- **Full**: up to four messages per guidance point, with all available information provided.

### Landmark guidance
Select to use landmarks when guidance is given:
- **Yes/No**

### Parking near destination
Select to display information about parking when you approach the destination:
- **Yes/No**

### Propose gas station
Select to display information about nearby gas stations when the vehicle's fuel level is low:
- **Yes/No**

### POI along the route
Select to display POIs along the route.
- **Yes/No**

A list will be displayed automatically when driving on a highway. See also the article "POIs along the route."

7 Certain markets only.
System settings

This article describes settings for the navigation system software and map versions.

Path:

Settings ➔ Navigation ➔ System

Software version

- **Base Map Version**: e.g., 00.20.00.18

See also the article "Updating map data with MapCare".

Map version

- **Map Information**: information about maps, updates and your favorite regions.

Related information

- Sensus Navigation settings (p. 44)
- Map updates with MapCare (p. 54)
MAP AND SYSTEM INFORMATION
Map updates with MapCare
Volvo Sensus Navigation remote updates can be done directly to the vehicle through a cell phone Internet connection or from a computer with a USB flash drive.

General update information
The system's maps are divided into a number of fixed regions. When updates are done, it is not necessary to update all of the regions at the same time but instead can be done for a specific region or several regions.

One or several regions can be updated from the vehicle's Internet connection. However, for major updates, a computer and a USB flash drive are recommended.

If an itinerary covers several regions, they should all have the same version number to enable the system to calculate the best route to the destination(s).

Updating the map structure
Changing the map structure may sometimes be necessary, e.g., if a region is added or if a large region is divided into smaller ones. If this is the case, normal updates may not be possible and a message will be displayed explaining what has happened.

In this situation, the entire map must be reinstalled from a USB flash drive. For additional information, contact a Volvo retailer.

Updating navigation system software
In addition to the maps, the system's software is being steadily developed and has to be updated occasionally. This may mean that newly downloaded map information may not be supported by the navigation system's software. If this happens, a message will be displayed indicating that the software needs to be updated. This can be done by a Volvo retailer or from a USB flash drive.

See the section "Software version" in the article "System settings."

Updates from the vehicle's Internet connection or from a USB flash drive
For detailed information, see the articles "Remote map updates" and "Map updates from the computer with a USB flash drive."

FAQs

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can the map database be changed, e.g., from Europe to North America?</td>
<td>Yes, with certain exceptions. Contact a Volvo retailer for up-to-date information.</td>
</tr>
<tr>
<td>How long do map updates take?</td>
<td>This depends on the size of the file(s) and the speed of the Internet connection.</td>
</tr>
</tbody>
</table>

Related information
- Remote map updates (p. 55)
- Map updates from a computer with a USB flash drive (p. 55)
- Sensus Navigation troubleshooting (p. 62)
- Copyright (p. 60)
- Navigation license agreements (p. 57)
- System settings (p. 51)
Remote map updates
Some preparation is necessary before a remote update can be made through the vehicle's cell phone Internet connection.

Preparations

Internet connection
The vehicle has to be connected to the Internet using Bluetooth, Wi-Fi, through a cable connected to the USB socket or using the vehicle's integrated modem. A symbol showing the connection's status can be seen in the center display's status bar.

See also the articles "Internet connected vehicle" and "Connecting to the Internet."

Downloading maps from the Internet
1. From the center display's Home view, swipe from right to left to access App view.
2. Select the Remote update service app and follow the instructions provided.

For additional information, see the Volvo Cars support site (support.volvocars.com) or contact a Volvo retailer.

Related information
- Map updates with MapCare (p. 54)

Map updates from a computer with a USB flash drive
Some preparation is necessary before a USB map update can be carried out.

Preparations
USB flash drive
For use in updates, a USB flash drive has to meet the following requirements:

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>USB standard (1.0/2.0/3.0):</td>
<td>At least 2.0</td>
</tr>
<tr>
<td>File system (Ext2/NTFS/FAT32):</td>
<td>FAT32</td>
</tr>
<tr>
<td>Capacity (8/16/32/64 GB):</td>
<td>The file size varies from market to market. See the file size under &quot;Detailed information&quot; for your market at the Volvo Cars support site (support.volvocars.com).</td>
</tr>
</tbody>
</table>

1. From the center display's Home view, swipe from right to left to access App view.
2. Select the Remote update service app.
3. Mark a region and tap the down-arrow for information about the current map version or tap Install to see if there is a newer version.

Downloading maps from the Internet to a USB flash drive
From a computer with an Internet connection, connect to the Volvo Cars support site (support.volvocars.com) and follow the instructions on the screen.

1. Tap "Detailed information" for the region to be updated.
2. Information about the latest maps for the region will be displayed. Verify that it is newer than the version in the vehicle.
3. Connect a USB flash drive to the computer and download the update to the USB drive.

The amount of time for the download varies according to the size of the file and the speed of the Internet connection.
Transferring the updated maps from the USB drive to the vehicle

General information
This transfer may take between 30–60 minutes depending on the file size. This must be done with the navigation and infotainment systems activated.

If the engine is not running, it may be necessary to connect a battery charger to avoid discharging the battery. An update can also be done while driving.

During a complete map download, certain infotainment system functions may not be available or have limited functionality:

- Navigation
- Voice commands
- Information/media stored on the vehicle's hard drive

Updating
1. Activate the navigation system (see the previous section "Current map version").
2. Connect the USB drive to the vehicle’s USB socket in the tunnel console.
3. The navigation system will automatically detect any available updates. The update’s progress will be displayed on the screen as %.

The driver must tap Confirm to start the update or Cancel to interrupt it.

4. Tap Confirm. The update will begin and progress information will be shown on the center display.
5. The center display will indicate when the update has been completed. Remove the USB drive from the socket.
6. Verify that the correct map information has been transferred by repeating the procedure in "Current map version."

Interruptions

<table>
<thead>
<tr>
<th>What happens if...</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>...the infotainment system is turned off while an update is in progress?</td>
<td>The process will pause and will continue automatically when the system is reactivated.</td>
</tr>
<tr>
<td>...the USB flash drive is removed from the USB socket while an update is in progress?</td>
<td>The process will pause and will continue automatically when the USB drive is reconnected to the USB socket.</td>
</tr>
</tbody>
</table>

If an update is interrupted, an explanatory text will always appear on the center display.

For additional information, see the Volvo Cars support site (support.volvocars.com) or contact a Volvo retailer.

END-USER TERMS
The content provided (“Data”) is licensed, not sold. By opening this package, or installing, copying, or otherwise using the Data, you agree to be bound by the terms of this agreement. If you do not agree to the terms of this agreement, you are not permitted to install, copy, use, resell or transfer the Data. If you wish to reject the terms of this agreement, and have not installed, copied, or used the Data, you must contact your retailer or HERE North America, LLC (as defined below) within thirty (30) days of purchase for a refund of your purchase price. To contact HERE, please visit www.here.com. The Data is provided for your personal, internal use only and may not be resold. It is protected by copyright, and is subject to the following terms (this “End User License Agreement”) and conditions which are agreed to by you, on the one hand, and HERE and its licensors (including their licensors and suppliers) on the other hand. For purposes of these terms, “HERE” shall mean (a) HERE North America, LLC with respect to Data for the Americas and/or the Asia Pacific region and (b) HERE Europe B.V. for Data for Europe, the Middle East and/or Africa. The Data includes certain information and related content provided under license to HERE from third parties and is subject to the applicable supplier terms and copyright notices set forth at the following URL: here.com/supplierterms

TERMS AND CONDITIONS
License Limitations on Use: You agree that your license to use this Data is limited to and conditioned on use for solely personal, noncommercial purposes, and not for service bureau, timesharing or other similar purposes. Except as otherwise set forth herein, you agree not to otherwise reproduce, copy, modify, decompile, disassemble or reverse engineer any portion of this Data, and may not transfer or distribute it in any form, for any purpose, except to the extent permitted by mandatory laws.

License Limitations on Transfer: Your limited license does not allow transfer or resale of the Data, except on the condition that you may transfer the Data and all accompanying materials on a permanent basis if: (a) you retain no copies of the Data; (b) the recipient agrees to the terms of this End User License Agreement; and (c) you transfer the Data in the exact same form as you purchased it by physically transferring the original media (e.g., the CDROM or DVD you purchased), all original packaging, all Manuals and other documentation. Specifically, Multidisc sets may only be transferred or sold as a complete set as provided to you and not as a subset thereof.

Additional License Limitations: Except where you have been specifically licensed to do so by HERE in a separate written agreement, and without limiting the preceding paragraph, your license is conditioned on use of the Data as prescribed in this agreement, and you may not (a) use this Data with any products, systems, or applications installed or otherwise connected to or in communication with vehicles capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (b) with, or in communication with, including without limitation, cellular phones, palmtop and handheld computers, pagers, and personal digital assistants or PDAs.

Warning: This Data may contain inaccurate or incomplete information due to the passage of time, changing circumstances, sources used and the nature of collecting comprehensive geographic Data, any of which may lead to incorrect results.

No Warranty: This Data is provided to you “as is”, and you agree to use it at your own risk. HERE and its licensors (and their licensors and suppliers) make no guarantees, representations or warranties of any kind, express or implied, arising by law or otherwise, including but not limited to, content, quality, accuracy, completeness, effectiveness, reliability, fitness for a particular purpose, usefulness, use or results to be obtained from this Data, or that the Data or server will be uninterrupted or error free.

Disclaimer of Warranty: HERE AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) DISCLAIM ANY WARRANTIES, EXPRESS OR IMPLIED, OF QUALITY, PERFORMANCE,
MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT. Some States, Territories and Countries do not allow certain warranty exclusions, so to that extent the above exclusion may not apply to you.

Disclaimer of Liability: HERE AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) SHALL NOT BE LIABLE TO YOU IN RESPECT OF ANY CLAIM, DEMAND OR ACTION, IRRESPECTIVE OF THE NATURE OF THE CAUSE OF THE CLAIM, DEMAND OR ACTION ALLEGING ANY LOSS, INJURY OR DAMAGES, DIRECT OR INDIRECT, WHICH MAY RESULT FROM THE USE OR POSSESSION OF THIS DATA; OR FOR ANY LOSS OF PROFIT, REVENUE, CONTRACTS OR SAVINGS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF YOUR USE OF OR INABILITY TO USE THIS DATA, ANY DEFECT IN THIS DATA, OR THE BREACH OF THESE TERMS OR CONDITIONS, WHETHER IN AN ACTION IN CONTRACT OR TORT OR BASED ON A WARRANTY, EVEN IF HERE OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Some States, Territories and Countries do not allow certain liability exclusions or damages limitations, so to that extent the above may not apply to you.

Export Control: You agree not to export from any—where any part of the Data or any direct product thereof except in compliance with, and with all licenses and approvals required under, applicable export laws, rules and regulations, including but not limited to the laws, rules and regulations administered by the Office of Foreign Assets Control of the U.S. Department of Commerce and the Bureau of Industry and Security of the U.S. Department of Commerce. To the extent that any such export laws, rules or regulations prohibit HERE from complying with any of its obligations hereunder to deliver or distribute Data, such failure shall be excused and shall not constitute a breach of this Agreement.

Entire Agreement: These terms and conditions constitute the entire agreement between HERE (and its licensors, including their licensors and suppliers) and you pertaining to the subject matter hereof, and supersedes in their entirety any and all written or oral agreements previously existing between us with respect to such subject matter.

Severability: You and HERE agree that if any portion of this agreement is found illegal or unenforceable, that portion shall be severed and the remainder of the Agreement shall be given full force and effect.

Governing Law: The above terms and conditions shall be governed by the laws of the State of Illinois (for Data for the Americas and/or the Asia Pacific region) or The Netherlands (for Data for Europe, the Middle East and Africa), without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for Contracts for the International Sale of Goods, which is explicitly excluded. For any and all disputes, claims and actions arising from or in connection with the Data (“Claims”), you agree to submit to the personal jurisdiction of (a) the State of Illinois for Claims related to Data for the Americas and/or the Asia Pacific region provided to you hereunder, and (b) The Netherlands for Data for Europe, the Middle East and/or Africa provided to you hereunder.

Government End Users: If the Data is being acquired by or on behalf of the United States government or any other entity seeking or applying rights similar to those customarily claimed by the United States government, this Data is a “commercial item” as that term is defined at 48 C.F.R. (“FAR”) 2.101, is licensed in accordance with this End User License Agreement, and each copy of Data delivered or otherwise furnished shall be marked and embedded as appropriate with the following “Notice of Use”, and be treated in accordance with such Notice:
NOTICE OF USE

Sensus Navigation troubleshooting
The following information provides answers to frequently asked questions.

The vehicle’s location on the map is not correct
The navigation system’s accuracy is approx. 65 ft (20 meters).
Accuracy may be reduced slightly when driving on a road that is parallel with another road, winding roads, multi-level roads and long straightaways with no distinct curves.
High mountains, buildings, tunnels, viaducts, multi-level roads, etc., may also affect GPS signal reception, which may also reduce the system’s capacity to calculate the vehicle’s location accurately.

The system does not always calculate the fastest/shortest route
Route calculation takes factors such as distance, road width, type of road, number of right/left turns, traffic circles, etc., into account to find the theoretically best route. Familiarity with an area may enable you to find a more efficient route to your destination.

The system uses toll roads, highways or ferries even though I have chosen to avoid them
When calculating longer routes, the system may have to choose major roads for technical reasons.

The types of roads that you have chosen to avoid will not be used if there are viable alternatives.

After being transported, the vehicle’s location on the map is not correct
If the vehicle has been transported (e.g., on a ferry or train) where GPS signals have been blocked, it may take up to 5 minutes before its location will be shown correctly.

The car symbol moves erratically after new tires have been installed
In addition to GPS signals, the navigation system also uses the speedometer and a gyroscopic sensor to calculate the vehicle's current location and speed. If e.g., a spare tire or snow tires have been installed, the system has to "learn" the new tire dimensions. To do so, drive for a short period on a road with unobstructed GPS reception.

The map does not correspond to actual road conditions
Due to road changes/additions/rerouting/new traffic regulations, the map database may not be up-to-date. The database is continuously being updated. Consult your Volvo retailer.

The car symbol jumps forward or spins
Before you begin to drive, the system may need several seconds to determine the vehicle’s location.

Switch off the navigation system and the ignition. Restart but remain at a standstill for a minute or so before driving.

The map information is not up-to-date
See the next heading.

How can I check which map version I have?
1. From the center display’s Home view, swipe from right to left to display App view.
2. Select the Remote update service app.
This contains information about the current map version. See also "Updating map data with MapCare" for additional information or contact your Volvo retailer.
